

Mini Split Ductless Blower Cleaning

Dear Valued Customer,

Thank you for choosing Go Green Heating & AC for your HVAC needs. As part of our commitment to ensuring the optimal performance and longevity of your mini split ductless system, Go Green Heating & AC highly recommends periodic blower cleaning. This essential maintenance task serves several important purposes outlined below:

Why Do I Need This?

- **Improved Air Quality:** Over time, dust, dirt, and other airborne particles can accumulate on the blower unit of your mini split ductless system. This buildup can degrade indoor air quality and contribute to respiratory issues, allergies, and discomfort.
- **Enhanced Efficiency:** A clean blower unit facilitates better airflow and heat exchange within your HVAC system. By removing obstructions and debris, you can improve the efficiency of your mini split system, leading to lower energy consumption and reduced utility bills.
- **Prevention of Mold and Organic Growth:** Mini split ductless systems are susceptible to mold and organic growth, particularly in humid environments. The blower unit provides an ideal breeding ground for these contaminants if not properly maintained. Regular cleaning helps mitigate the risk of mold and organic growth, ensuring a healthier indoor environment.

How We Do the Cleaning and Why:

- **Thorough Inspection:** Our technicians will start by inspecting the blower unit of your mini split ductless system to assess the extent of dirt buildup and any signs of mold or organic growth.
- **Safe and Effective Cleaning Methods:** Using specialized tools and cleaning solutions, we carefully remove accumulated dust, dirt, and debris from the blower unit. Additionally, we address any mold or organic growth present, utilizing techniques that are safe for both your HVAC system and indoor air quality.

- **Preventive Measures:** In addition to cleaning the blower unit, we may recommend preventive measures to minimize the risk of future contamination, such as installing UV germicidal lamps or implementing humidity control solutions.
- **Quality Assurance:** Once the cleaning process is complete, our technicians perform a thorough inspection to ensure that the blower unit is clean, functioning optimally, and free from mold or organic growth.

Schedule Your Blower Cleaning Today!

Don't wait until issues arise—schedule your mini split ductless blower cleaning with Go Green Heating & AC today to enjoy improved air quality, enhanced system efficiency, and peace of mind. Our team is dedicated to providing reliable maintenance services tailored to your specific needs.

Thank you for choosing Go Green Heating & AC for your HVAC maintenance needs. Should you have any questions or require further assistance, please feel free to contact us at 206-620-1600 or visit our website at www.gogreenheating.com to schedule an appointment.
